

accordion frame TUTORIAL

for more tutorials, check out www.melissaesplin.com

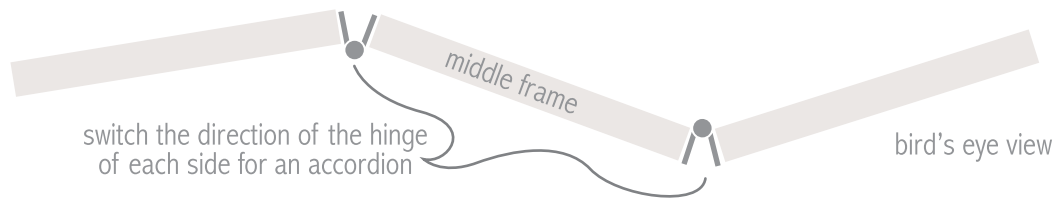

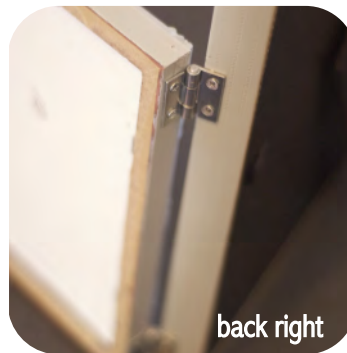

Supplies Needed:

drill
pencil
4 mini hinges
3 wood frames
photos

Purchase frames [any size] from local thrift store, craft/hobby store. Spraypaint. Or not. Some frames come with mats already in them, for the frame that didn't, I just cut out the desired shape with an X-acto knife from thick cardstock. Print out photos and attach to mat. Clean glass.

Attach Hinges

Arrange your frames. Take the shortest frame [mine being the middle], and attach hinges [see illustration]. Drill pilot holes before screwing hinges. Line frames up on a flat surface and mark holes. Attach anchored hinges to the adjacent frame.

Display Your Handiwork

Show off your craftiness on an empty bookshelf, coffee table, or window sill. Get even craftier by adding more frames to your accordion.
